

VIRTUAL TRADESHOW EXHIBITING

Virtual exhibits allow you to connect with potential clients in a virtual space, often in real-time. Share product literature, videos, surveys, social media links, and presentations

Virtual exhibit marketing is intended to be immersive, experiential, and typically self-guided. Clients can explore the booth, moving from reception area to demo kiosk, for example with just a click. Watch product videos, download documents, or live chat with a representative.

Pre-Show Planning

Virtual Exhibiting is all about the tasks that happen before the 3D Visual Exhibit is created and programmed.

Unque is here to help you implement your virtual booth that will help you entice and beguile attendees to visit you on the virtual show floor.

Virtual Display Options

- ✓ Logo header with website or social media links
- ✓ Video feed or popup
- ✓ Live Social media feed, live chat and/or live Q&A
- ✓ Download product literature and press releases
